Vol. XIV 1944

The

Indian Journal of Agricultural Science

Issued under the authority

of

The Imperial Council of Agricultural Research

Annual subscription
Rs. *15* or *23s. 6d.*

Price per part
Rs. *3* or *5s.*

PUBLISHED BY THE MANAGER OF PUBLICATIONS, DELHI
PRINTED BY THE MANAGER, GOVERNMENT OF INDIA PRESS, CALCUTTA
1946

Price annas 4 or 5d.

ICAR. 17, XIV
600.

Editorial Committee

H. R. Stewart, C.I.E., M.Sc., F.R.C.Sc.I., D.I.C., N.D.A., I.A.S. *Vice-Chairman, Imperial Council of Agricultural Research*

Major G. Williamson, O.B.E., M.R.C.V.S., D.V.S.M., *Animal Husbandry Commissioner with the Government of India*

Hem Singh Pruthi, M.Sc. (Ph.), Ph.D. & Sc.D. (Cantab.), F.R.A.S.B., F.N.I., *Director, Imperial Agricultural Research Institute, New Delhi*

F. C. Minett, D.Sc., M.R.C.V.S., *Director, Imperial Veterinary Research Institute, Mukteswar*

Zal R. Kothavalla, B.Ag., B.Sc., N.D.D., *Dairy Development Adviser to the Government of India, New Delhi*

J. N. Mukherjee, C.B.E., D.Sc., *Ghose Professor of Chemistry, University College of Science and Technology, Calcutta*

Birbal Sahni, M.A., Sc.D. (Cantab.), D.Sc. (Lond.), F.R.S., *Professor of Botany, Lucknow University, Lucknow*

James N. Warner, M.Sc., *Professor of Animal Husbandry and Dairying, Allahabad Agricultural Institute, Allahabad*

S. Krishna, C.I.E., Ph.D., D.Sc., F.I.C., *Bio-Chemist, Forest Research Institute, Dehra Dun*

S. M. Srivastava, I.C.S., *Secretary, Imperial Council of Agricultural Research*

Editor

F. M. de Mello, B.A., B.Sc. (Econ.)

The Editorial Committee, in its work of examining papers received for publication, is assisted in an honorary capacity by a large number of scientists working in various parts of India.

Editorial communications including books and periodicals for review should be addressed to the Secretary, Imperial Council of Agricultural Research, Publication Section, New Delhi.

Communications regarding subscription and advertisements should be addressed to the Manager of Publications, Civil Lines, Delhi.

Instructions to Authors

Articles intended for The Indian Journal of Agricultural Science should be accompanied by short popular abstracts of about 300 words each.

In the case of botanical and zoological names the International Rules of Botanical Nomenclature and the International Rules of Zoological Nomenclature should be followed.

References to literature, arranged alphabetically according to authors' names, should be placed at the end of the article, the various references to each author being arranged chronologically. Each reference should contain the name of the author (with initials), the year of publication, title of the article, the abbreviated title of the publication, volume and page. In the text, the reference should be indicated by the author's name, followed by the year of publication enclosed in brackets; when the author's name occurs in the text, the year of publication only need be given in brackets. If reference is made to several articles published by one author in a single year, these should be numbered in sequence and the number quoted after year both in the text and in the collected references.

If a paper has not been seen in original it is safe to state 'Original not seen'.

Sources of information should be specifically acknowledged.

As the *format* of the journals has been standardized, the size adopted being crown quarto (about $7\frac{1}{8}$ in. $\times 9\frac{5}{8}$ in. cut), no text figure, when printed, should exceed $4\frac{1}{2}$ in. $\times$ 5 in. Figures for plates should be so planned as to fill a crown quarto plate, the maximum space available for figures being $5\frac{3}{4}$ in. $\times$ 8 in. exclusive of that for letterpress printing.

Copies of detailed instructions can be had from the Secretary, Imperial Council of Agricultural Research, New Delhi.

——, estimation of carbonates in 377
—— (Indian), acid extracts obtained by different methods 140
—— of India, comparative studies on . 333, 345
——, contribution of clay, silt and sand fractions towards base-exchange capacities . 137
——, comparison of base-exchange capacities and degree of saturation of . . 74
—— of the Deccan canals 101
Soils (red and lateritic), physico-chemical and mineralogical properties 117
—— (rice), effect of algal growth on the activity of *Azotobacter* in 277
Solanum tuberosum, *see* potato 288
—— virus I, occurrence of 288
Sowing date, nitrogen, water-supply and spacing, interrelation on growth and yield of 4F P.-A. cotton 18
Spacing, water-supply, nitrogen and sowing date, interrelating on growth and yield of 4F P.-A. cotton 18
——, variation in the measurable characters of cotton fibres due to 222
Spacings, influence on some winter varieties of rice 248
Species of *Phyllosticta* causing leaf-spot of *Carica papaya* L. 395
Sphacelotheca spp., *see* smuts 49
Split-plot and strip arrangements of field experiments 315
Spot (leaf) of *Carica papaya* L. 395
Squashes of citrus, sodium benzoate in preservation of 319
——, *see* juices 171
Standard errors of different types of treatment comparisons in split-plot and strip arrangements of field experiments 315
Standardization of curry powders . . . 322
Starch, photo-hydrolysis of 383
Statistical notes for agricultural workers . 248, 315
—— study of flower production in cotton . 78
Stem-rot diesease of rice in the Punjab . . 44
Stem-weevil of jute, bionomics and life-history . 295
Strip arrangement of field experiments, different types of treatment comparisons in . . . 315
Sugarcane physiology in the Deccan canal tract . 1
—— top-borer infestation . . . 233
Sulphate of ammonia, availability of nitrogen in, when applied to various soil types . . . 101

T

Temperatures of cotton plant leaf . . . 385
Ten per cent probability of Z and the variance ratio 244
Tetraploid cottons, cytological investigations on 30
Thrips of onion 308
—— *tabaci*, *see* onion thrips 308
Tilletia spp., *see* smuts 49
Tirak and normal plants of cotton, trend in growth 152
—— of cotton, amelioration of . . . 181
Tolyposporium cymbopogonis, *see* smuts . . 49
Tomato, Big-bud disease of 160
—— juice, preservation of 89
Top-borer of sugarcane, infestation of . . 233
Treatment comparisons in split-plot and strip arrangements of field experiments, calculation of standard errors and tests of significance of . 315

U

Ultra-mechanical analysis of soils, effect of preliminary treatments on 216
Urocystis spp., *see* smuts 49
Ustilago spp., *see* smuts 49

V

Variance ratio and ten per cent probability of Z . 244
Variation in the measurable characters of cotton fibres 222, 311
Variety, influence on the composition and quality of barley 109
Vegetables, preservation of 167
Virus diseases of potatoes 288
Vitamin-C content of citrus fruit squashes . . 171

W

Water-supply, spacing, sowing date and nitrogen, inter-relation on growth and yield of 4F P.-A. cotton 18
White-fly of cotton, bionomics of . . . 53
William's pears, effect of maturity on the canning quality 167
Winter varieties of rice, influence of dates of planting and spacings on 248

Y

Yield of 4F P.-A. cotton, interrelation of sowing date, nitrogen, water-supply and spacing on . 18

Z

Z, ten per cent probability and the variance ratio 244
Zea Mays, *see* maize 303
